

A Green Commitment 24/7/365

**Take a
Video Tour!**

Every morning as the sun rises, the Unitex team is cleaning and delivering fresh linens and uniforms to healthcare facilities throughout the northeast. Our products are reusable which means the Unitex business model is fundamentally “green” every single day. But we also do so much more to conserve and protect resources like water, electricity, natural gas, fuel, air quality, and land use. Take a tour by watching our green video which highlights the daily practices that demonstrate our ongoing stewardship and green mindset.

Conservation Stats

Unitex proactively sets the "green" standard!

- Water is conserved by **reusing clean water**;
- **Water is softened** to be more receptive to the wash chemistry;
- **Hot water from the end of the wash cycle** is used to raise the temperature of incoming cold water;
- **LED lighting** reduces electrical use;
- **Dry times are programmed** to the item in the dryer;
- Automation increases **higher hourly throughput**;
- A **computerized maintenance system** reduces machinery downtime;
- **Staff is trained** to be proactive on reading and responding to daily resource usage statistics;
- **1.8 million lbs. of plastic** a year is recycled;
- **100% organic chemicals** are used;
- Fleet of 200 trucks is **equipped with the latest technology** to save fuel and keep air clean;
- Our **green-mindset** is shared at educational events;
- **Reusable items** are donated to non-profits;
- **Plant tours** demonstrate green practices.
